

KEEPING WATCH OVER YOUR CHURCH BY NIGHT AND DAY

ChurchCAM provides an affordable solution to protect your church, employees and visitors from crime and loss through fire.

The church-shaped solution

Peace of mind and security for your church and community

With more than 150 years experience in the clockmaking industry, there is probably no other firm in the world which visits as many churches as we do each year.

Our awareness of the increasing vulnerability of our church buildings was something we could not ignore. Our innovative solution to this growing problem of church security, combines our knowledge and experience of the latest technology to create ChurchCAM, dedicated to the needs of the church community.

Keeping the needs of the church at heart, we have developed ChurchCAM, using technology specially selected for church use, to give the greatest benefits at an affordable price.
