

W107 windvane

Standard Windvanes

Materials and finish

Smith of Derby windvanes are engineered for durability and long life. Moving parts are in stainless steel and turn freely on "oilite" self-lubricating bushes. Vane and cardinal arms are manufactured from 5mm thick 1050 grade aluminium, finished in 2-pack black acrylic. Optional gilding using 23 1/2 carat double thickness gold leaf is available.

Size and design options

Two standard sizes, small and medium, are available with 14 vane options. Special designs including lightning conductor or lightning preventor options can be manufactured to order. A large windvane measuring 1,400mm across is also available to order.

Gilding and colour options

Standard finish is black, with any BS or RAL colour available as an option. Gold leaf can be applied to arrowhead, vane motif and cardinal point letters. The W125 design already includes parts of the vane in gold leaf.
